

The Squeaky Buzzbait Secret

Tools You'll Need: A file, a pair of pliers with teeth and Strike King Sugar Buzz.

Step 1: Crimp the rivet with the pliers so that it does not move

Step 2: File or scuff the top edge or lip of the rivet.

Step 3: File or scuff the bottom of the blade edge. Use a file or pliers (as shown) to scuff the bottom of the buzzbait where the pliers are clamped onto.

You're done and ready for battle.
