

HOW TO SKIN A DEER

WITH AN AIR COMPRESSOR

THERE'S MORE THAN ONE WAY TO SKIN A DEER! USING AN AIR COMPRESSOR MAY SOUND STRANGE AT FIRST, BUT IT'S ACTUALLY ONE OF THE SIMPLEST AND EASIEST WAYS TO CLEANLY AND QUICKLY SKIN A DEER.

FOLLOW THESE DIRECTIONS

THE ABOVE DIAGRAM IS A BRIEF OVERVIEW. BELOW IS A MORE DETAILED GUIDE ON HOW TO EXECUTE THIS.

01

HANG YOUR DEER

YOU CAN HANG YOUR DEER BY THE BACK LEGS OR BY THE ANTLERS. FOR THIS DEMONSTRATION WE'LL HANG IT BY ITS BACK LEGS.

CUT A HOLE

USE A KNIFE TO CUT A SMALL HOLE IN THE DEER'S THIGH. IT SHOULD BE JUST BIG ENOUGH TO FIT THE NOZZLE OF THE AIR COMPRESSOR.

02

03

INSERT NOZZLE

INSERT THE AIR COMPRESSOR NOZZLE INTO THE HOLE YOU MADE. IF YOU MAKE THE HOLE TOO BIG YOU'LL HAVE TO PUT A CLOTH AROUND THE NOZZLE TO MAKE IT AIR-TIGHT.

TURN ON AIR

TURNING ON THE COMPRESSOR FORCES AIR UNDER THE DEER'S SKIN AND SEPARATES IT FROM THE MEAT.

04

05

REPEAT AS NEEDED

FEEL ALONG THE DEER'S SKIN AND MAKE SURE IT'S LOOSE. IF SOME PARTS ARE STILL STUCK, CUT ANOTHER HOLE OR TWO NEAR THOSE SPOTS AND USE THE AIR COMPRESSOR AGAIN.

SKIN THE DEER

USE A KNIFE TO CUT THE SKIN ALONG THE DEER'S BACK LEGS. THE REST OF THE SKIN SHOULD BE VERY LOOSE FROM THE AIR COMPRESSOR. THEN PULL AND PEEL THE SKIN DOWNWARD, USING YOUR KNIFE TO CUT THROUGH ANY SPOTS THAT MIGHT BE STUCK.
